Executive Summary

I've written 35k+ lines of code in the past 7 years building & maintaining a commercial web application for our company. Application includes a lead management system that manages over 24,000 active leads. Broad experience with full-stack development using version control (GIT, GitHub), package management (Composer, apt-get), API integration (Twilio, Stripe), SQL, and the entirety of the LAMP stack.

Previously worked in a large SAAS company with around 30 other developers. SCRUM meetings, Jira, GIT pull requests, and code reviews were all part of a typical day. Proven ability to work within a team. Effective communicator.

Technical Skills

Backend: PHP (7 years), MySQL, Postgres, JSON, Bash / Shell / Terminal
